

Geoff Stratton

Sacramento, CA | (530) 220-5469 | geoffstratton@gmail.com | <https://github.com/geoffstratton> | <https://www.linkedin.com/in/geoffstratton>

Experience

Senior DevOps Engineer, DevOps Tools & Automation, Delta Dental of California (Sacramento) **1/2022-Present**

- Built multiple deployment and provisioning pipelines in GitHub Enterprise Cloud (GHEC) with automated smoke/regression testing and code rollback, security and code quality scanning (Aqua, CodeQL, SonarQube, Spectral), package/container management (GHEC packages, ACR), secret management (AKV), and logging (Datadog).
- Analyzed and resolved security issues identified in GHEC (CodeQL, Dependabot, secret scanning).
- Developed automation to convert the company's Docker infrastructure to Podman and Kubernetes.
- Developed and maintained Azure Kubernetes deployments with Helm and Argo CD.
- Migrated applications, tools, and repositories from an on-prem model (VMware, GitHub Enterprise, JFrog Artifactory, CloudBees, Splunk) to a hybrid/cloud model (Azure services, GHEC). Built automation and documentation to support the migration.
- Managed deployments and upgrades of tools inside scheduled maintenance windows.

Systems Engineer, Unix Engineering, Delta Dental of California (Sacramento) **12/2019 – 12/2021**

- Converted Chef cookbooks into Ansible playbooks for server setup and application installs on the company's 2,000+ Red Hat Linux systems. Created HashiCorp Packer and Terraform templates to provision RHEL 7 and 8 images into VMs.
- Researched and resolved CVEs identified by security tools like Nexpose and Kenna. Performed automated monthly patching of all RHEL systems, both on-prem and in the Azure cloud.
- Integrated Ansible roles in Docker images simulating Linux virtual machines, with Molecule; and against VMware virtual machines using CI/CD and automation tools (GitHub, Jenkins, Rundeck, Red Hat Satellite, Jira, Artifactory) and monitoring (Splunk, Nagios, OBM, Carbon Black).
- Wrote Python tests (pytest) to validate Ansible code, and built test deployment systems as needed.
- Contributed to Delta's Azure cloud initiative; converted RHEL images to VM templates with libvirt and qemu, and performed failover and failback of Linux VMs via Azure Site Recovery.

Owner and Systems Architect, GeoffStratton.com, Sacramento, CA **2015 – 2024**

- Ran independent web hosting and development company using the AWS and Linode/Akamai platforms.
- Managed infrastructure including provisioning, application setup, and email and web application security.
- Tech stack included Ubuntu, Postfix, Dovecot, RoundCube, Nginx, Apache, Ansible, fail2ban, Snort, OSSEC, MySQL-compatible databases, and Amazon VPC, EC2, Lambda, and API Gateway.
- Resolved customer requests using the OTRS ticketing system, and monitored web forums, newsletters, and mailing lists for developments in virtualization, cloud technology, Linux, and security.

Senior Software Developer, Office of Admissions, University of Texas, Austin, TX
6/2016 – 9/2017

- Redeveloped the primary Admissions and Financial Aid public web sites in Drupal and WordPress.
- Built internal and external applications and marketing communications using PHP, Python (Django framework), JavaScript, SQL, HTML5, and CSS3.
- Integrated applications with campus enterprise authentication (Shibboleth/SAML2) and identity management (SailPoint IdentityIQ).
- Tracked vulnerabilities in Nessus and Rapid7 and fixed security exploits in legacy applications. Also performed security monitoring and patching of RHEL server infrastructure.
- Monitored published sites and communications for compliance with responsive and accessible design standards like WCAG 2 and Section 508 using tools such as WAVE.

Professional Certifications (Active)

- Microsoft Azure Fundamentals (AZ-900)
- CompTIA Project+
- ITIL Foundations v3
- CIW Site Development Associate

Education

Western Governors University, Salt Lake City, UT — *Bachelor of Science, Computer Science* (Expected completion in 2026.) Calculus, discrete math, networking, data structures and algorithms, data management principles, computer architecture, software engineering, Java, C++, SQL.

University of California, Davis, CA — *Bachelor of Arts, English Literature*

Shakespeare, film, 19th and 20th century English and American literature, medieval literature, technical communication.
